

## PRESS RELEASE

### OneVision showcases automation software at C!Print Lyon

Regensburg/Lyon. At C!Print Lyon, February 4–6, software manufacturer OneVision will demonstrate a wide range of use cases for wide format printing. Automation projects from the segments advertising, vehicle wrapping, interior, photo products and stickers will be featured, among others.

#### Seamless Integration with Wide Format Automation Suite

OneVision's Wide Format Automation Suite software offers flexible, powerful automation that connects diverse systems for printing, finishing, and embellishment through structured data exchange. The middleware streamlines production from file input to output, ensuring optimal substrate utilization through intelligent nesting, tiling, and cut-line management. Industry leaders like Showdown Displays, Oxy, and Photoweb have successfully optimized production with OneVision's solutions.

#### More efficiency, digital overview and tracking for production

OneVision's "Stations" software integrates manual activities (e.g., sewing, drilling) and analog machines into digital workflows, providing step-by-step instructions to reduce errors. Real-time feedback and status updates improve tracking and help to meet service level agreements. The new "Workspace Production" dynamically groups and processes print jobs based on workflow and machine parameters, maximizing efficiency and machine utilization.

OneVision software will be as a co-exhibitor at the booth 1D11 of ERP/MIS specialist Dataline and invites wide format printing companies from all segments to experience new perspectives with automation.

#### About OneVision Software AG

OneVision Software AG is an international software manufacturer for automation of production processes in the printing and publishing sectors as well as numerous other industry segments. For almost 30 years, the company's automation solutions have helped more than 3,000 customers worldwide to achieve greater profitability. As a globally active company, the OneVision Group comprises entities in Germany, USA, Great Britain, France, Brazil, Singapore and India.
